Office Action Summary	Application No. 10/712,862	Applicant(s) SNIDER ET AL.	
	Examiner Sara Addisu	Art Unit 3722	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to: A lock set installation apparatus/gear, classified in class 408, subclass 115R.
- II. Claims 13-15, drawn to: Method of installing a lock set, classified in class 408, subclass 1.00R.

1. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). For Example the process of installing a lock-set does not require the rails to have plurality of gear teeth that mesh with gear teeth of the bolt lock hole mechanism (as claimed in claims 2, 3, 8 and 9). Additionally, the process of installing a lock-set also does not require the locking mechanism to have ratchet teeth coupled with a ratchet arm (as claimed in claims 4, 5, 10 and 11).

Art Unit: 3722

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. There is an excessive burden on the office to examine all of these inventions together, as shown by their search. See MPEP (808.02(C)). For example, the device of Group I will need to be searched in class 408, subclass 115, along with a unique text search. Group II would not be searched as above, but would instead be searched in class 408, subclass 1.00R accompanied by a different text search.
4. The Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
